1. EUPHA – ASPHER 2011: Copenhagen, Denmark – Public Health and Welfare – Welfare Development and Public Health

EUPHA and ASPHER are pleased to invite you to the 4th joint European Public Health Conference combining the 19th annual EUPHA meeting and the 33rd annual meeting of ASPHER. The conference will be organised from 9 to 12 November in Copenhagen jointly with the Danish Society of Public Health (DSOPH). The main theme of the conference is Public Health and Welfare – Welfare Development and Public Health.

At the moment, we have over 1000 registrations already. Please note that **online registration will close on 24 October at midnight**. After that, registration will be possible onsite in Copenhagen - please come directly to the registration desk at the Bella Centre, which will be open from Wednesday, 9 November at 8.00.

Accommodation

There are still hotel rooms available during the congress in Copenhagen. In order to achieve the favourable congress rates – you should book as soon as possible. Please go to the web site for more information or book directly via this link:
http://www.eupha.org/site/upcoming_conference.php?conference_page=6

The full programme is available at:
http://eupha.org/site/upcoming_conference.php?conference_page=26

You can now follow the updates on the EPH conference on TWITTER (<http://twitter.com/EPHconference>).

2. Call for proposals, papers, job opportunities

Establishing an evidence base for e-health: a call for papers (WHO)

Bulletin of the World Health Organization - June 2011;89:394-394. doi: 10.2471/BLT.11.090274
The deadline for submissions is **20 November 2011**
Website: <http://bit.ly/ICGFY7>

There are many definitions of e-health. In 2001 Eysenbach defined e-health as “an emerging field in the intersection of medical informatics, public health and business, referring to health services and information delivered or enhanced through the Internet and related technologies. In a broader sense, the term characterizes not only a technical development, but also a state-of-mind, a way of thinking, an attitude, and a commitment for networked, global thinking, to improve health care locally, regionally and worldwide by using information and communication technology.” The field has since evolved; the potential of e-health to help strengthen health systems and to improve the safety, quality and efficiency of care was recognized by the World Health Assembly in its resolution on e-health in 2005. This has raised high expectations from all stakeholders, many of which are still unmet. New e-health solutions are continually being designed, implemented and evaluated around the world.

From what evidence base, if any, are these solutions developed? Can e-health solutions truly improve health equity? What types of disparities do they minimize or exacerbate? How are health systems and their governance influenced by these e-health solutions, policies and practices?

Evidence is needed to promote equity of access to information and health services, and to strengthen activities and programmes that support local, regional, national and global health communities. There is a critical need to communicate evidence and to provide examples of best practice in the development of effective and efficient solutions to major health challenges. These could include: governance and multisectoral engagement, funding systems, system architectures, information systems implementation, capacity building, and areas such as equity in health systems, strategic planning, policy and regulatory frameworks, infrastructures, human capital development and system and data interoperability.

- The first objective of this theme issue of the Bulletin is to provide an authoritative, critical and independent overview of knowledge about the appropriate, transdisciplinary methods and applications in e-health. There have been considerable developments and experiences – social, technical and political – in the field of e-health in the past several years.
This theme issue aims to provide a credible source of evidence, authored by individuals representing different parts of the world, to help inform decisions on e-health and its application. It will draw on examples from around the world of the successes of health informatics. We welcome papers for the research and systematic review sections of the Bulletin and encourage authors to consider contributions that document evidence of impact of e-health methods and tools.
Suggested domains include: governance and management of health systems; equity of access to health care; transferable and sustainable economic models; health policy development; information sharing and interoperability to improve the quality, efficiency and continuity of care; information collection and aggregation for public health support; and health workforce development. We particularly seek papers that document experiences and lessons learnt in low-resource settings.
- The second objective of this theme issue is to include contributors from developing countries who typically do not have the opportunity to publish in international journals. It is likely that significant experiences and knowledge about many e-health issues do not make it to the mainstream scientific literature, as implementers and researchers involved in these projects may lack the resources, skills and/or contacts necessary to access these international communication channels. The International Medical Informatics Association will provide quality control and mentoring to ensure that these contributors get the appropriate level of support, if required.
Review papers will be commissioned to teams of authors, with a mix of internationally-recognized senior scientists and contributors who may have valid experiences and perspectives without writing practice. An important goal of this project is to develop writing capacities through a joint authorship and mentoring process.
- A third objective is to disseminate the key findings of this theme issue to high-level decision-makers, to promote a stronger commitment on e-health interoperability issues and its wider application.

The deadline for submissions is **20 November 2011**. Manuscripts should respect the Guidelines for contributors and mention this call for papers in a covering letter. All submissions will go through the Bulletin's peer review process.

Please submit to: <http://submit.bwho.org>

UMIT – University for Health Sciences, Medical Informatics and Technology

The Department of Public Health and Health Technology Assessment, in Hall i.T. / Innsbruck, Austria is searching for

- Public Health Experts
- Health Economists or Health Technology Assessment Experts
- Decision Scientists / Modellers
- Clinical Researchers (MD) with expertise in Personalized Cancer Medicine
- Research Assistants
- Information Specialists (e.g., MLIS)

to contribute to or lead research projects in public health, epidemiology, outcomes research, evidence-based medicine, health economics, HTA and personalized cancer medicine. UMIT is an internationally recognized private university dedicated to health & life sciences and also a partner of the ONCOTYROL Center for Personalized Cancer Medicine. The Department of Public Health is focused on international research, excellence in teaching and policy implementation.

Responsibilities: Working on research projects; Assisting and implementing trial protocols; Collaborating in development and implementation of quality assurance, data collection, and project management; Performing scientific analyses; Coordinating relevant scientific activities within the

Department (main fields: Public Health, Outcomes Research, HTA for National HTA authorities, Personalized Cancer Medicine); Conducting interim analyses and reporting as well as participating in publications for international biomedical journals; Involvement and contributing to education and training.

Qualifications: Successful candidates will hold a degree (Bachelor, Master, PhD) preferably in public health, epidemiology, biostatistics, or in an equivalent field. Additional qualification or experience in quantitative methods in public health/biomedicine preferred; Graduate degree in a biomedical field and experience in epidemiological studies in cancer preferred; Commitment to interdisciplinary team-oriented research; Experience in project management; Experience as a team player; Excellent communication skills in English; Experience in statistical analysis with SAS, SPSS etc. and modeling software (e.g., TreeAge, Arena, BerkleyMadonna, AnyLogics).

Employment will initially be for one year, with a possibility for extension.

The Department is committed to advancing employees who demonstrate excellent performance.

Further degrees can be achieved during the course of duties. Opportunities for part-time employment are available. UMIT is dedicated to promoting the role of women in science, and therefore expressly invites women to apply. Handicapped candidates with equal qualifications and personal aptitude will also be prioritized.

Further information can be obtained from the website at www.umat.at.

Interested candidates should apply with a cover letter, CV, publication list, educational certification and 2 letters of recommendation preferably by email to: public-health@umat.at

UMIT – University for Health Sciences, Medical Informatics and Technology

The Department of Public Health and Health Technology Assessment, in Hall i.T. / Innsbruck, Austria in Hall i.T. / Innsbruck, Austria

is searching for a

- Biostatistician / Epidemiologist

Applicants should have strong knowledge and active experience in practicing and teaching quantitative methods in Public Health. This includes, but is not limited to, Biostatistics, Epidemiology, Risk & Decision Analysis, Economic Evaluation in Health Care, Econometrics, Quality-of-Life Assessment, Health Technology Assessment (HTA), and Outcomes Research.

This position provides the opportunity to work in an interdisciplinary research team and to interact with the Medical University in Innsbruck, the University of Munich, Harvard University, and European Government HTA Agencies (NICE/UK, IQWiG/Germany, BIQG/Austria, EUnetHTA etc.) as well as other decision-making bodies. There are formal collaborations and exchange programs with the Ludwig Boltzmann Institute for HTA in Vienna/Austria, the Harvard School of Public Health in Boston/USA, and the Harvard Medical School in Boston/USA.

Candidates should have a commitment to working in an interdisciplinary research team and to teaching excellence at both the graduate and undergraduate levels (in Bachelor-, Master- and Doctoral Programs in Health Sciences with concentrations in Epidemiology, Health Technology Assessment and Health Decision Science).

Candidates should submit a C.V., selected publications, and a statement of research and teaching interests; and they should arrange for three letters of recommendation to be sent. Review of applications will begin immediately and will continue until the position is filled.

All materials should be sent by regular mail or email to: Dr. Holger Gothe, Dept. of Public Health and HTA, UMIT, Eduard Wallnoefer Center I, A-6060 Hall i.T., Austria (email: public-health@umat.at, Phone. +43-50-8648-3930, Fax +43-50-8648-673930).

UMIT is an Equal Opportunity Employer.

Southern Vaccine Advocacy Challenge (SVAC)/Defi Promotion de la vaccination dans le Sud (DPVS)

is now open for applications.

This is an exciting new program that aims to fund innovative ideas to strengthen public and political support for vaccines in low- and middle-income countries. Launched as a pilot project, the SVAC/DPVS will award five grants of up to \$10,000 USD each to support innovative advocacy initiatives around a specific vaccine-related event, issue or policy.

We are encouraging innovators from organizations based in low- and middle-income countries to apply with their bold ideas. Each grant will be selected based on the project's likelihood for impact, innovation and creativity, scalability, and technical merit and execution plans.

More information: <http://www.vaccinechallenge.org>

Deadline for applications: October 24, 2011.

3. Interesting news

WFPHA – working groups

The World Federation of Public Health Associations (WFPHA) has currently 4 active Working Groups. Please read the WG description on their website:

- [Environmental Health](#)
- [Global Health Equity](#)
- [Public Health Education](#)
- [Tobacco Control](#)

For more information or if you wish to join one of these groups, please contact directly the correspondent Chair person:

Environmental Health : [Dr. Peter Orris](#).

Global Health Equity: [Prof. Bettina Borisch](#) or [Dr. Deborah Walker](#).

Public Health Education: [Dr. Ehud Miron](#).

Tobacco Control: [Prof. Mike Daube](#)

Use of sub-national indicators to improve public health in Europe (UNIPHE)

The overall aim of the project is to develop a sustainable environmental health monitoring system consisting of a set of sub-national indicators to improve public health across Europe. The creation of a consistent and common framework within Europe will facilitate the comparability of health status data. Therefore the project will provide a tool to enable member states to reduce the burden of disease through control of hazardous environmental exposures and their health effects

To ensure European added value for public health improvement, activities of this project are focussed on: the development of a harmonised system of environmental health indicators; collation of data; development of a method to compare regions; and collation of policies which deliver positive outcomes to ensure transferability within Europe.

Interested contacts can join our newsletter mailing list by sending a request to uniphe@hpa.org.uk or through the contact us page on our website www.uniphe.eu

EuSANH news

The European Science Advisory Network for Health (EuSANH) will formally finalise its project 'Improving Science Advice for Health in Europe (EuSANH-ISA)' and launch its new organization on 13-14 October in Bucharest. Presidents of Science Advisory Bodies in Europe interested to participate as founding member at the first Governing Council meeting to discuss and agree on the first constitution and on the membership can contact the secretariat at d.coenen@gr.nl.

The final results of the EuSANH-ISA project will be presented at our workshop 'Translating science into policy: illustration of a methodological framework for science advice' on Friday 11 November 13.45 hr at the European Public Health Conference in Copenhagen. More information can be found at our website and newsletter www.eusanh.eu.

New: European Center for Injury Prevention Universidad de Navarra

The above mentioned centre has become a WHO Collaborating Center for Injury Prevention.

Publications can be found at: <http://www.unav.es/ecip/english/news/OMS.html>.

4. EUPHA update

The general objective of PHIRE is to contribute to the improvement of public health knowledge and practice across the European Union by assessing the impact and uptake of the first Public Health Programme (PHP) and structuring information on public health research. At the moment, the work packages are busy with data collection: from our sections, but also from our national members.

During the Copenhagen 2011 conference, the PHIRE project will be presenting its results, work and future activities in a workshop entitled: **The political economy of health research in Europe** on Saturday 12 November from 11:30-13:00. Lunch will follow this interesting workshop, so don't miss it! The project is also planning regional meetings with our members during the Copenhagen 2011 conference.

EUPHA sections:

Some of the EUPHA sections publish their own newsletter. For instance the section on health services research and the section on public health economics. You can download these from their websites at: <http://eupha.org/site/sections.php#Sections> You can join our sections by going to: http://www.eupha.org/cgi-files/mem_db.cgi

EUPHAnxt

EUPHAnxt is growing steadily. At the moment we have just under 100 subscribers for this network of students and young public health professionals. Collaboration has been set up with:

- International Federation of Medical Students' Associations
- International Sociological Association
- European Federation of Psychology Students' Associations

5. EUPHA member updates

Welcome to this section of the EUPHA newsletter, in which we summarize the activities of our members. We continue to summarize information we have received directly from our members in different languages. We hope to include more and more of our members in this new section.

French Society of Public Health - www.sfsp.fr

Congrès SFSP 2011 – Lille – programme now available

La Société française de santé publique a le plaisir d'annoncer son prochain congrès pluri-thématique "*Experts et expertises en santé publique. Diversité des acceptions, multiplicité des enjeux : comment avancer ?*" qui se déroulera à Lille, au Grand Palais, du 2 au 4 novembre 2011.

New address SFSP

1, rue de la forêt
54520 Laxou
France

University of Maastricht – Department of International Health - <http://inthealth.eu>

Invitation to the Euregio II conference "*Effective cross-border care: Next Generation*". The conference will take place on Wednesday, November 16th, 2011 at the historic Theater La Bonbonnière in the heart of Maastricht.

The conference will examine how the growth of cross-border care in Europe's border regions intersects with the evolution of the European Union in coming decades. Speakers will focus on three themes (Technology, Inequalities and Politics/Law) at two levels (Regional Development and European Vision to 2050). Renowned Dutch historian and journalist Geert Mak will give the keynote address.

The conference is an initiative of the Euregio II project "Solutions for improving health care cooperation in border regions" which is funded by the European Commission (DG SANCO).

Register now by clicking [here](#). (75,- Euros through October 15th. Late registration 95,- Euros after October 15th).

6. Upcoming courses and conferences

Going International (GI) promotes training and further education for experts and newcomers in public health and humanitarian assistance around the globe. The flagship of GI is the international course

catalogue "medicine & health", a unique annual publication listing courses and congresses in the fields of biomedicine, public health and development cooperation. For further information: <http://www.going-international.at/index.php?lang=EN> Global International is an official partner of EUPHA.

10. WHO publications

Technical guidance on water-related disease surveillance

(Edited by E. Funari, T. Kistemann, S. Herbst and A. Rechenburg)

This guidance is intended to assist the countries that are Parties to the Protocol on Water and Health to the 1992 Convention on the Protection and Use of Transboundary Watercourses and International Lakes in establishing and/or strengthening their detection and early warning systems, contingency plans and capacity to respond to outbreaks of water-related disease accordance with article 8 of the Protocol.

The guidance reviews the main threats to health related to water services, recalls basic concepts of epidemiology and disease surveillance and advises on data management and analysis. It will therefore also support countries' efforts towards national and international health security, in line with the International Health Regulations (2005). The Parties to the Protocol approved this guidance in November 2010.

For more information about the book, how to order and a link to the electronic version check:

<http://www.euro.who.int/en/what-we-publish/abstracts/technical-guidance-on-water-related-disease-surveillance>

Policy guidance on water-related disease surveillance

This booklet contains guidance on the policy related to water-related disease surveillance developed by the Task Force on Water-related Disease Surveillance established under the Protocol on Water and Health to the 1992 Convention on Protection and Use of Transboundary Waters and International Lakes.

The guidance explains countries' legal obligations related to disease surveillance under the Protocol and other international frameworks, and gives advice on policy to set up and maintain an effective and efficient disease surveillance system. These explanations are coupled with illustrative examples of good practice in the European Region.

For more information about the book, how to order and a link to the electronic version check:

[Non communicable diseases: country profiles 2011](#)

This WHO report provides information required by countries worldwide to assess their situation in face of the growing threat posed by noncommunicable diseases (NCDs). The country profiles reveal an enormous burden on mortality and alarming rates for risk factors like tobacco smoking, physical inactivity, raised blood pressure, overweight and obesity, raised cholesterol and raised blood glucose. There are also signs of positive improvement in some countries where health systems have been strengthened and population strategies have been effectively applied.

21 September, 2011

[Global Atlas on cardiovascular disease prevention and control](#)

This joint report of the World Health Organization and the World Heart Federation Organization reveals the necessity to act against cardiovascular diseases. Data shows that both governments and individuals need to take action against heart disease and stroke.

28 September, 2011

[From burden to 'best buys': Reducing the economic impact of NCDs in low- and middle-income countries](#)

This newly published study of WHO showcases low-cost solutions to help curb the tide on noncommunicable diseases.
