1. EUPHA update

Successful V4 Conference in Prague

On the 19-20 October, the 3rd V4 Conference on Public Health was organised in Prague. Martin Dlouhy, president of the Czech Society of Social Medicine, was the organiser of this event. Over 70 public health professionals from the Czech Republic, Hungary, Slovakia and Poland exchanged information on public health research, policy and practice. The presidents of all national public health associations were present as well, showing the importance of this regional meeting. In the closing ceremony, Prof Roza Adany, president of the Hungarian association, invited all participants to the planned 4th V4 meeting in Debrecen, Hungary in May 2019.

European public health: then, now and the future 25 years of EUPHA

The European Journal of Public Health published a new supplement to celebrate EUPHA's 25th anniversary. EUPHA asked some of its members, all experts in their fields, to reflect upon the main public health issues facing Europe and the added value of the European collaboration that we have worked on together during this time. [The result](#) is an overview of public health in Europe—the wider Europe—with the evidence-base needed to address the key challenges, and how we can work together to take (European) public health forward over the next 25 years.

EUPHA on its way to the 10th European Public Health Conference in Stockholm

EUPHA, EUPHA members and EUPHA office are all preparing to travel to Stockholm to attend the 10th European Public Health Conference. During the Stockholm 2017 conference, EUPHA will celebrate its 25th anniversary. The EUPHA Sections, EUPHA pillar advisors and EUPHA Executive Council are all looking forward to a fully packed programme with a large number of presentations linked to EUPHA's activities in 2017 and plans for 2018.

2. European Public Health Conference

10th European Public Health Conference: 'Sustaining resilient and healthy communities', Stockholm, 1 - 4 November 2017

STOCKHOLM 2017: EVERYBODY WILL BE THERE

Starting on the 1st of November early morning with a full pre-conference programme, the 10th European public health Conference in Stockholm has a fully packed programme. With 1'922 registrations today, the Stockholm 2017 conference will be the largest conference we have organised so far.

The [Stockholm Declaration](#) – on sustaining resilient and healthy communities – was set up by EUPHA and the Swedish Association of Social Medicine and has already been supported by a large number of actors at national and international level.

3. European Journal of Public Health

The [European Journal of Public Health](#) is a multidisciplinary journal in the field of public health.

The EJPH is published bimonthly. The journal provides a forum for discussion and debate of current international public health issues with a focus on the European region. In 2017, the impact factor of the journal is at 2.431. The 5-year impact factor is 2.664.

The EJPH is the official journal of EUPHA.

How the 1918 flu pandemic revolutionized public health

Nearly 100 years ago, in 1918, the world experienced the greatest tidal wave of death since the Black Death, possibly in the whole of human history. We call that tidal wave the Spanish flu, and many things changed in the wake of it. One of the most profound revolutions took place in the domain of public health.

Obesity in children and teens rose sharply worldwide over past 4 decades

In just over four decades, obesity levels in children and teenagers have risen dramatically worldwide, though that rise has been far from uniform. In a new study published online Tuesday British researchers and the World Health Organization say those levels have plateaued lately in high-income countries, "albeit at high levels," while the rise in obesity rates has only accelerated in regions such as East Asia and Latin America.

Social acceptance more important than economic factors in fertility treatment availability

A new British study has shed light on some of the reasons why Assisted Reproductive Technologies (ART) usage varies across Europe -- pinpointing moral and social acceptance of the treatment and religion as key. Scientists have, for the first time, assessed the relative importance of the role that economic, demographic and cultural normative factors play in the process.

Multiple research approaches are key to pandemic preparedness

Preparedness in the face of major disease outbreaks can save thousands of lives. A new article examines the multifaceted nature of effective preparedness and the role that biomedical research plays. Specifically, the article examines three approaches to pandemic preparedness: pathogen-specific work, platform-based technologies, and prototype-pathogen efforts.

The end of pneumonia? New vaccine offers hope

A new vaccine under development provoked an immune response to 72 forms of the bacteria that's responsible for pneumonia, sepsis and meningitis. That's up from the 23 forms of bacteria covered by current immunizations. The new vaccine, which represents the 'most comprehensive' coverage of pneumococcal disease to date, could greatly reduce the number of deaths from the disease.

5. Upcoming courses and conferences

Going International is the first source for finding courses, seminars, congresses and other events in the fields of medicine & health. Going International is Europe's biggest service provider and information platform and serves as an interface between organisers and participants of events. Going International is an official partner of EUPHA.

7. European Commission news

eHealthTallinn 2017: 'Health in the Digital Society. Digital Society for Health'

This EU conference, held 16-18 October in Tallinn, focused on how digital technologies and wider use of health data are changing our lives and the ways of healthcare. It showed already existing digital health solutions, use-cases and technologies to demonstrate that value-adding citizen-centric health services and systems are the reality and the future has already arrived.

Re-Health 2 - Implementation of the Personal Health Record as a tool for integration of refugees in EU health systems

Implemented by the International Organization for Migration, this project, co-funded by the EU Health Programme, aims to test further use of the Personal Health Record tool, intended to help integrate migrants and refugees in EU health systems. [Read more...](#)

Third Health Programme (2014-2020): Mid-term review shows major progress in improving cooperation in health and healthcare

Most notably, the Commission has helped to:

- establish 24 European Reference Networks for rare disease patients who can now benefit from the best expertise available in Europe,
- increase Member States' capacity-building potential to respond to outbreaks such as Ebola and Zika viruses,
- and strengthen the EU's migration policy by helping EU countries cope with the health needs of migrants and refugees and training health professionals and support staff.
